Phone: (916) 341-5350  
Email: smarquez@waterboards.ca.gov

### **Education:**

1993: Bachelor of Science in Civil Engineering, California State University, Sacramento.

California Professional Civil Engineer: Number C57443

### **Work Experience:**

March 1998 – Present: Water Resource Control Engineer, Licensing Unit,  
Division of Water Rights, State Water Resources Control Board, Sacramento

Duties include: Field inspect permitted water projects. Tasks to conduct such an inspection consist of, but are not limited to, the following:

- Perform a full engineering inspection and examination of the works constructed and the use of water,
- Prepare an engineering report containing observations, measurements and calculations leading to a finding and recommendation that a water right license be offered the permittee, that the permittee be given more time to complete the project and develop the full beneficial use of the water, or that the permit be revoked for lack of diligence, and
- Prepare a request for license if the investigation shows water use is complete and the licensed amount of water is favorable to the permittee, or if the project is not complete, obtain the necessary information to support a recommendation for an extension of time or revocation of the permit. If enforcement is recommended, prepare administrative civil liabilities and cease and desist orders

October 1993 to February 1998: Water Resource Control Engineer, Technical Unit  
Division of Clean Water Programs, State Water Resources Control Board, Sacramento

Duties included: Provide technical review of underground storage tank claims for reimbursement of environmental remediation. Review remediation bids and costs associated with remediation efforts.
